

ControlPoint Suite - Sit-Down Kit

Program Overview

The ControlPoint Suite is a modern, mobile-first platform for managing permits, isolation, inspections, and asset safety.

Modules Included

- ControlPoint: Permit-to-Work
- RedTag: Lockout/Tagout
- Asset Management: Equipment tracking, checklists, and sourcing

Key Features

- Offline functionality
- QR/NFC smart tagging
- Voice and wearable support
- Digital twin visualization
- Real-time KPIs and ESG reporting

Training & Support

Includes Safety Learning Hub, just-in-time training, admin tools, and contractor oversight.

Deployment Options

Cloud-hosted or offline standalone. Compatible with all modern mobile and desktop environments.

Security & Access

Role-based permissions, password protection, audit trail, and optional MFA.

Client Customization

Supports white labeling, company-specific branding, policy integration, and hardware recommendations.

Next Steps

1. Explore the live preview
2. Review sample permit PDFs and training
3. Request a guided walkthrough or pilot deployment
